

To whom it may concern at the FCC:

I have chosen to support and use XM satellite radio. I believe it is unjust to limit the offerings that I am PAYING for and force me to use a local source for traffic, weather and any other local information. The American public does not respond well to being forced to do anything. Any decisions that are made to block the offerings of satellite radio companies may well backfire on the very businesses that feel they will reap the benefit of such legislation. It is my hope that you do not institute any legislation that limits my choices. I am free to choose to listen to any local FREE or satellite PAY station at this time. I will always vote to keep the choice. I will always vote to keep our freedoms.

Thank you.
